

It's almost time for the golf tournament and we've got some exciting news! This years scoring will be done live using **Event Caddy Live Scoring**. So what does this mean for you? Instead of writing your score on a paper card and waiting hours for the results to be tallied, here is what will happen:

- 1** On the day of the event, designate one player within your group to be score keeper.
- 2** The score keeper opens the Event Caddy Tournament App on their phone (Download via app store or Google Play Store)
- 3** Login to the app with the phone number you used when registering for the event. You will be texted a code for access.
- 4** Give your team a name (this name is visible to all teams, so keep it clean and fun).
- 5** After each hole, enter players' scores and instantly see how you rank against other teams!

Download App:

Please do not enter any scores before the day of play!
